

MIROSLAV PEČEK

AI-Powered Full-Stack Developer

Building smart web applications and automating business processes with AI, cloud technologies and modern web stacks.

Full-Stack Development

AI & Automation Solutions

Cloud & Database Expertise

Business-Focused Results

PROFESSIONAL SUMMARY

Full-stack developer with a strong background in engineering and automation. I build modern web applications, integrate AI solutions and automate business processes to increase efficiency and reduce costs.

Experienced in delivering end-to-end solutions — from idea and architecture to deployment and long-term support.

My unique combination of technical expertise, problem-solving mindset and practical experience in industrial systems allows me to bridge the gap between technology and real business needs.

KEY PROJECTS

AI Meter Reading System

AI-powered tool for automatic recognition of industrial meters from photos. Includes OCR, historical matching, confidence scoring and Excel export.

OpenAI API

Python

OCR

Supabase

Fire Protection Management Platform

Web application for technicians. Includes CRM, scheduling of inspections, PDF certificates, invoicing and reminders.

React

Supabase

PostgreSQL

PDF API

Online Training & Certification Portal

E-learning platform (onlineskoleni.eu) with quizzes, certificates and PDF generation. Admin dashboard, user management, analytics — plus marketing via Google Analytics & Google Ads.

Supabase

React

PostgreSQL

PDF API

Business Websites & Web Applications

Design and development of modern websites in Framer, Divi and Cursor AI with a focus on UX, performance and conversion.

Framer

Divi

Cursor AI

HTML/CSS

PROFESSIONAL EXPERIENCE

2025 – Present

Freelance AI-Powered Full-Stack Developer

Remote / Various Clients

- Design and development of custom web applications and automation solutions.
- Integration of AI (OpenAI API, Vision models) for data extraction and workflows.
- Building databases, APIs and user interfaces from scratch.
- Automation of business processes and generation of PDF documents.
- Marketing management with Google Analytics and Google Ads (onlineskoleni.eu).

2023 – 2026

Facility Management Specialist & Technician

Farm Therm s.r.o., Prague

- Integration of supervision systems and automation of energy readings.
- Remote monitoring and diagnostics of HVAC and electrical infrastructure.
- Creating technical proposals and managing client portfolios.

2021 – 2022

Freelance Electrical Technician

Smart Home Systems Integration, Brno

- Installation and integration of smart home solutions and electrical systems.

2018 – 2020

Electrical Technician

Teaz s.r.o., Otrokovice

- Commissioning and startup of industrial machinery.
- Troubleshooting and resolving complex electrical issues.
- Assembly and wiring of control systems and panels.

2015 – 2017

Operator and Programmer (CNC)

Sykora kitchens, Vizovice

- CNC machine operation and programming (IMA Novimat).

EDUCATION

2024

Tester Academy – SKLO12

Skillmea

Course in Fundamentals of Programming and Software Testing (3-month program)

2010 – 2014

Technical High School

SPŠ Zlín, Zlín

Low-current Electrical Engineering

CERTIFICATES & LICENCES

Certified Electrician

Czech Republic, Licence §7

Tester Academy – SKLO12

Skillmea

Driving Licence B

Car

Driving Licence A

Motorbike

INTERESTS

Traveling & Exploring

2 years of experience in Latin America

IT & Technology

Development, AI, automation, new tools

Sport

Running, cycling, hiking, basketball, MTB

CORE TECHNOLOGIES

AI & AUTOMATION

- OpenAI API (GPT, Vision)
- OCR & Image Processing
- Prompt Engineering
- Automation & Workflows
- Cursor, Claude Code

BACKEND & DATABASE

- Supabase
- PostgreSQL / SQL
- RESTful APIs
- Authentication & RLS
- Database Design

FRONTEND & WEB

- React (basics)
- HTML5, CSS3, JavaScript
- Framer
- WordPress / Divi
- responsive design

TESTING & QA

- Selenium
- Postman
- Test Scenarios
- Jira
- Catalon Recorder

TOOLS & DEVOPS

- Git & GitHub
- VS Code
- Docker (basics)
- Deployment & Hosting
- CI/CD (basics)
